Health Insurance Industry - AI Employees Register

The health insurance industry, function by function - AI Employees register

Owner's ask (4 Nov 2026): *"NOW A HEALTH INSURANCE INDUSTRY AI EMPLOYEE LIST"*. Seventh in the series after `healthcare_industry/` (160 roles), `pharmacy_industry/` (118), `hospital_industry/` (128), `medical_devices_industry/` (118), `diagnostics_industry/` (108) and `medical_education_industry/` (107). This one is the money side: the insurer, the third-party administrator (TPA), the broker/agent/POSP, the government scheme, the employer's group plan, the reinsurer, the claims-exchange platform, and the aggregators and insurtech around them. Payer roles already in earlier registers (HC#94-103, HO#78-85, PH-side claims) are cross-referenced and not counted.

13 fields, 108 candidate AI Employees.

How honest this is

- No new web research for this file. It is **domain knowledge, not a sourced census**. Rules named are from memory and **must be re-checked on primary text** before building: IRDAI (Health Insurance regulations and the 2024 master circular on health insurance business - cashless, claim settlement timelines, grievance, standardisation), Insurance Act 1938, Protection of Policyholders' Interests regulations, IRDAI TPA and broker/POSP rules, Insurance Ombudsman Rules 2017, NHCX (National Health Claims Exchange) and ABDM, PM-JAY / state schemes / CGHS / ECHS / ESIC rules, GST on premiums, DPDP Act 2023. Abroad: US ACA, CMS-0057-F prior-auth timelines, HIPAA, state insurance law (NAIC), EU/UK conduct rules, Solvency II for reinsurers. Several Indian circulars were revised in 2024-2025: check dates.
- Nothing is built. Hoola's relevant plumbing today: the Bazar insurance connectors, `ins` lane (policies/premium reminders, renewals - an agent-side desk already exists in `employee/roles.py`: "insurance agent"), Khata ledger, WhatsApp opt-in campaigns, document reading, Data Desk + pylab, `health_int` (HL7 / FHIR / ABDM), approval cards.

The findings that shape every health-insurance desk

1. The decision rights are the product and they are regulated

Ladder as before: **A** admin/prepare, **B** assist (flag / draft for a named human), **C** reserved. Reserved here: underwriting acceptance/decline/loading, claim denial or repudiation, claim settlement amount sign-off, fraud accusation, policy cancellation, medical opinion on necessity, reserving and pricing sign-off by the appointed actuary, regulatory filings, and anything that gives advice on suitability without the licensed adviser. Rule in the US/EU/India alike: **an AI may speed up, never be the sole basis of a denial** (CMS WISeR keeps clinician decisions; IRDAI expects human-reviewed rejections with reasons; EU AI Act classes insurance pricing/underwriting of health as high-risk). Every denial letter must carry a human name and reasons the customer can contest.

2. The customer's pain is the claim: delay, rejection, jargon, paperwork

Policyholders buy cover once and meet the insurer on the worst day. Most pain is: which documents, which hospital is cashless, why was it cut (co-pay, room-rent proportionate deduction, non-payables, sub-limits, waiting periods, pre-existing), how long, who do I call. An AI Employee that stands on the **customer's** side (checks documents before filing, explains deductions in plain language, tracks the clock, escalates to the grievance ladder / Ombudsman) is useful and lawful, and Hoola's brand is exactly "your avatar works for you".

3. Three sides, three different buyers

- **Insurer / TPA** (claims cost, fraud, speed, regulators)
- **Intermediary** (agent, broker, POSP, bank-assurance, aggregator, employer HR)
- **Policyholder / hospital / employer** (cashless pre-auth, final bill, reimbursement, renewals) A feature that is a win for one can be a loss for another (faster fraud detection vs faster payout). The register tags the seat each role serves in the first bracket.

4. Data and fairness are the regulated edge

Health data is special-category (DPDP, HIPAA, GDPR). Underwriting AI that uses health, genetics or lifestyle can discriminate; pricing models need explainability, no proxies for caste/religion/disability, and audit trails. Rule-based checks with printed reasons beat black boxes. Hoola's pattern: every flag shows its rule and its source.

THE REGISTER (seat - AI Employee - what it does - tier - the human who decides)

Seats: [I] insurer / TPA, [X] intermediary, [P] policyholder / hospital / employer, [G] government scheme, [R] reinsurer / regulator.

1. Product design, pricing & actuarial

1. [I] Product Design Assistant - benefit grids, exclusions, waiting periods, sub-limits drafted from the filed template and IRDAI standardisation; **filing by the appointed actuary / compliance** - B - product head
2. [I] Competitor Product Benchmarker - plan features, premiums, claim ratios across insurers from public documents - A - product head
3. [I] Pricing Data Preparer - claims, exposure, trend and loadings tables cleaned and reconciled (pylab); **rate sign-off by the appointed actuary** - A - actuary
4. [I] Experience Analyst - loss ratios, claim frequency/severity by age, city, hospital tier, disease cluster; run-off triangles - A - actuary
5. [I] Medical Inflation & Hospital-price Watcher - tariffs, procedure price trends, device price ceilings - A - actuary
6. [I] Reserving Assistant - IBNR triangles, method comparison tables; **reserve sign-off reserved** - B - appointed actuary
7. [I] Pricing Fairness Auditor - tests rating factors for proxy discrimination and unexplainable jumps - B - chief risk officer
8. [R] Reinsurance Treaty Analyst - cession tables, large-loss lists, bordereaux checks - A - reinsurance manager
9. [I] Wellness-programme Designer - rewards design, incentive caps, evidence sources (no pressure to disclose conditions) - B - product + compliance

2. Distribution: agents, brokers, POSPs, banks, aggregators, employers

10. [X] Needs Analysis Assistant - family, income, city, existing cover, conditions asked as a structured form; suggests *questions to ask*, not a recommendation - A - licensed adviser

11. [X] Plan Comparison Explainer - side-by-side of premium, cover, room-rent cap, co-pay, waiting periods, network hospitals, claim-settlement history, in plain Hinglish; **suitability call by the adviser** - B - agent / broker
12. [X] Quote & Proposal Form Filler - fills the proposal from the customer's documents, flags missing/contradictory answers; **customer signs the declaration** - A - agent
13. [X] Material-facts Checker - prompts about pre-existing disease disclosure so the customer does not under-declare (most rejected claims start here) - B - agent / customer
14. [X] KYC & Document Collector (Aadhaar-masked, PAN, bank, medical reports; Pehchaan Locker rules) - A - agent
15. [X] Lead Qualifier & Follow-up Scheduler (opt-in WhatsApp, call-back slots, no cold-spam) - A - agent
16. [X] POSP Training Companion - IRDAI POSP syllabus, product knowledge quizzes, mock exam - A - POSP
17. [X] Renewal Reminder & Portability Advisor - upcoming renewals, no-claim bonus, portability window rules, premium history (the existing `ins` lane) - A/B - agent
18. [X] Agent Commission & Compliance Tracker - commissions, clawbacks, mis-selling complaint log; licence/CE renewal - A - principal officer
19. [X] Aggregator Comparison Compliance Checker (claims honest ranking, sponsored-label rules) - B - compliance
20. [P] Group Policy Benchmarker for Employers (cover per head, sum insured, maternity, parents, premium, claims ratio, TPA scorecard) - A - HR head
21. [P] Employee Benefits Helpdesk (enrolment windows, add dependents, e-cards, FAQs, who-to-call; empowers HR) - A - HR

3. Underwriting & policy administration

22. [I] Proposal Intake Triage - completeness, ID match, simple rule-based routing to auto-accept / medical / refer; **decline is human** - B - underwriter
23. [I] Medical Report Reader - extracts values from pathology/ECG/discharge summaries into structured fields with page cites - A/B - underwriter
24. [I] Underwriting Rule Engine Explainer - shows which rule fired (age band, BMI, HbA1c, smoking), the manual page, the loading table - B - underwriter decides
25. [I] Referral Case Summariser - one-page brief of the file with the open questions - B - senior underwriter
26. [I] Policy Issuance & Endorsement Clerk (schedule, e-card, member add/delete, address/nominee change with proof) - A - policy servicing
27. [I] Free-look & Cancellation Handler (refund calc, proof, timelines) - A - servicing
28. [I] Premium Collection & Mandate Tracker (e-mandate, bounce chase, grace-period alerts, GST invoice) - A - finance
29. [I] Renewal Underwriting Reviewer (post-claim re-rating rules vs IRDAI limits; **no unfair loading**) - B - underwriter
30. [I] Portability & Migration Intake Assistant - accepts the previous insurer's data, credits waiting periods per rule - A/B - underwriter
31. [I] Genetic/Wearable Data Guard - blocks use of data that the law or the insurer's filed policy does not allow - B - compliance

4. Cashless, pre-authorisation & hospital network

32. [P] Pre-auth Packager for Hospitals - fills the cashless request from the chart: diagnosis, planned procedure, estimate, doctor, ICD/package code, attachments (HO#80) - A/B - TPA desk
33. [I] Pre-auth Reviewer's Assistant - checks policy status, waiting period, sub-limits, package rates, medical necessity criteria against the filed guideline; **approval/denial human** - B - medical officer

34. [I] Query/Enhancement Responder (hospital replies to insurer queries; drafts from chart) - B - TPA desk (HO#81)
35. [P] Cashless Eligibility Checker for the Patient (is this hospital in network, estimated co-pay, room-rent cap) - A - patient / front desk
36. [I] Network Hospital Onboarding Assistant (empanelment documents, tariff comparison, NABH/NABL check, geo-coverage map) - A - provider relations
37. [I] Hospital Tariff Benchmarker (same procedure across hospitals; outlier prices flagged) - A/B - provider relations
38. [I] Network Quality Scorecard (claims turnaround, complaint rate, readmission rate, overcharging flags) - B - network head
39. [P] Final Bill Auditor for Hospitals (non-payables, package vs actual, discharge docs; HO#82) - A - billing
40. [I] Discharge Authorisation Clock (live pre-auth/discharge timers; the 2-hour discharge-approval-style rules where they apply, alert to a person) - A - claims desk
41. [G] PM-JAY / State Scheme Pre-auth Desk (HBP package selection, mandatory documents, photos, geo-tagged evidence, auto-approval windows) - A/B - scheme desk

5. Claims management

42. [I] Claim Intake & Document Completeness Checker (OCR, required-document list by claim type, missing-item request letter) - A - claims desk
43. [I] Claim Registration Clerk (policy match, member, hospital, dates, ICD/CPT mapping proposal) - A - claims desk
44. [I] Medical Scrutiny Assistant - timeline of admission, investigations, procedure; compares with the diagnosis/package; flags gaps, not conclusions - B - claims medical officer
45. [I] Coverage & Exclusion Checker - waiting periods, pre-existing disease rules (with moratorium), room-rent proportionate deduction math, co-pay, sub-limits; every line shows its clause - B - claims adjudicator
46. [I] Payable Amount Calculator (itemised, non-payables list, tariff cap, deductible; transparent worksheet) - A - claims desk
47. [I] Rejection-letter Drafter (reason, clause quoted, documents considered, appeal path, ombudsman details; **signed by a named decision-maker**) - B - claims head
48. [I] Settlement & Payment Reconciler (UTR matching, partial settlements, TDS/GST, hospital vs reimbursement) - A - finance
49. [I] Claim Status Messenger (every status change to the customer, in their language) - A - claims desk
50. [I] Reimbursement Claim Assistant for Customers (document checklist, pre-submission self-check, deadlines) - A - customer (see 78)
51. [I] Subrogation & Third-party Recovery Tracker (motor-accident cases, other-insurer overlap) - A - recoveries
52. [I] Claims Quality Auditor (sample of settled claims re-checked, overpayment/underpayment rate) - B - claims QA head
53. [I] Ageing & Turnaround Monitor (claims pending beyond regulatory timelines, escalation) - A - claims head
54. [I] Large-claim / Catastrophe Surge Planner (staffing, reinsurance notification, queue rules after floods/epidemics) - A - claims head

6. Fraud, waste & abuse (FWA)

55. [I] Provider Pattern Analyst (billing outliers, upcoding, unbundling, cloned discharge summaries) - B - SIU investigator
56. [I] Duplicate-claim & Identity-match Detector (same member in two hospitals the same night, ghost patients) - B - SIU

57. [I] Document Authenticity Checker (stamps, fonts, metadata consistency; **forgery claim only by investigator**) - B - SIU
58. [I] Hospital Geo-and-Travel Plausibility Checker (impossible distances, hospital capacity) - B - SIU
59. [I] Cashless Misuse Detector (planned procedure upgraded after approval; unnecessary admissions; short-stay patterns) - B - SIU + medical officer
60. [I] Investigator Case Builder (timeline, evidence table, interview questions; **allegation reserved**) - B - SIU head
61. [R] Industry Blacklist & Intelligence Sync (IIB-type shared fraud data within privacy law) - A/B - SIU + compliance
62. [I] Fraud-model Fairness & False-positive Auditor - B - chief risk officer

7. Customer service, grievance & ombudsman

63. [I] Contact-centre Agent (voice/WhatsApp: policy, claim, premium, network, forms; escalates distress or complaint to a human) - A - customer-care head
64. [I] Grievance Intake & Classifier (IRDAI grievance categories, due dates, acknowledgement) - A - grievance officer
65. [I] Grievance Response Drafter (facts from the file, clause, remedy options) - B - grievance officer signs
66. [I] Ombudsman Case File Assembler (Insurance Ombudsman Rules 2017 packet: policy, claim file, rejection letter, correspondence index) - A - legal
67. [I] Consumer-court Defence Packet Builder - A/B - legal counsel
68. [I] Voice-of-customer Analyst (complaints, calls, reviews: topics, spikes, root causes, pylab) - A - CX head
69. [I] Multilingual Document Translator (policy wording, letters in regional languages, glossary-locked) - B - bilingual reviewer
70. [I] Accessibility Assistant (large print, audio policy summary, WhatsApp voice for elderly) - A - CX

8. Compliance, regulation & governance

71. [I] Regulatory Change Watcher (IRDAI circulars, GST, DPDP, health-ministry notices -> impact list) - A - compliance head
72. [I] Filing Calendar & Return Assembler (IRDAI returns, MIS, audit schedules; **submission by the principal officer**) - A - compliance
73. [I] Policy-wording Plain-Language Reviewer (flags jargon, ambiguity, hidden exclusions; contra-proferentem risk) - B - legal + product
74. [I] Mis-selling Detector (call-recording keyword review, cooling-off, free-look compliance, proposal discrepancies) - B - compliance
75. [I] Claims-data Privacy Guard (access audit, consent artefact tracking, minimum-necessary views) - B - DPO
76. [I] Model Governance Officer (inventory, bias/drift tests, human-override rates for every tier-B employee; HC#160) - B - AI governance committee
77. [I] Audit Support Assistant (internal/statutory audit samples, evidence index) - A - internal audit

9. Policyholder-side advocacy & wellbeing (the customer's own AI Employee)

78. [P] Claim Companion - tracks hospitalisation: what to do before admission (intimation, cashless request), documents at discharge, filing deadlines, follow-ups; **never a medical or legal opinion** - A - policyholder
79. [P] Deduction Explainer - reads the settlement letter and explains each cut with the policy clause; suggests questions to ask the insurer - B - policyholder / adviser
80. [P] Rejection Appeal Drafter - reasons-to-points mapping, supporting documents list, grievance letter, ombudsman complaint steps with limitation dates - B - policyholder / lawyer

81. [P] Policy Vault - all policies, premiums, renewal dates, nominees, family members, e-cards, one place (Pehchaan Locker rules) - A - policyholder
82. [P] Coverage Gap Advisor (compare cover with city hospital costs, family size; prompts to review, not a sales push) - A/B - policyholder / adviser
83. [P] Premium-tax & 80D Helper (receipts, limits, parents' cover; **tax filing by the filer**) - A - policyholder / CA
84. [P] Hospital Estimate Comparer (cashless vs reimbursement, room-rent trap, package quotes) - A - policyholder
85. [P] Chronic-care Cover Planner (disease management programmes, OPD covers, wellness rewards) - A/B - policyholder

10. Government schemes & public payers

86. [G] Beneficiary Eligibility Navigator (PM-JAY, state schemes, CGHS, ECHS, ESIC: documents, nearest empanelled hospital, how to claim) - A - CSC / scheme helper
87. [G] Scheme Hospital Claim Tracker (package, geotag/photo proof, pre-auth, discharge, payment ageing) - A - hospital scheme desk
88. [G] Scheme Audit & Anomaly Analyst (district/hospital outliers, duplicate IDs; **action by authority**) - B - state health agency
89. [G] Fund-flow & Reimbursement Reconciler (state vs central shares, hospital payments, arrears) - A - finance officer
90. [G] Grievance & Helpline Assistant for Beneficiaries (multilingual, voice-first, escalates to nodal officer) - A - helpline lead
91. [G] Enrolment Camp Organiser & Follow-up Caller - A - district health officer

11. Data, interoperability & claims-exchange infrastructure

92. [I] NHCX / ABDM Integration Engineer (claims exchange messages, HCX codes, consent artefacts; `health_int` lane) - A/B - integration lead
93. [I] FHIR Claim/Coverage Mapper (HL7 FHIR claim, coverage eligibility, ClaimResponse resources) - A/B - integration lead
94. [I] Code-Mapping Assistant (ICD-10 / CPT / HBP / hospital package codes to payer codes; ambiguous maps flagged) - B - clinical coder
95. [I] Master Data Reconciler (member, provider, policy IDs, duplicates) - A - data steward
96. [I] Data Quality & Lineage Auditor - A - data governance
97. [I] De-identified Analytics Sandbox Builder (for pricing/research with DPDP-safe datasets) - B - DPO + analytics head
98. [I] Cybersecurity Watcher for Claims Systems (access anomalies, exfiltration patterns, incident drills) - B - CISO

12. Finance, operations & enterprise functions

99. [I] Claims-cost Dashboard Builder (loss ratio, TAT, leakage, hospital mix; pylab) - A - CFO
100. [I] GST, Statutory & Accounting Assistant (premium GST, input credit, commissions, TDS) - A - finance
101. [I] Vendor & Outsourcing Manager (TPA SLAs, call-centre SLAs, medical-panel fee invoices) - A - operations
102. [I] Capacity & Staffing Planner (claims desks, call volumes by season: monsoon, dengue, festival season) - A - operations
103. [I] Investment & Solvency Data Prep (asset-liability data cleaning; **investment decisions human**) - A - CIO / actuary
104. [I] HR & Training Assistant for Claims/UW staff (competency matrix, mock claims, refreshers) - A - HR

105. [I] Business Continuity & Surge Planner (data-centre failover, claim-system downtime pack) - A - COO

13. Education, research & public interest

106. [P] Insurance Literacy Tutor (what is co-pay, sub-limit, waiting period, portability; for the public and school/college courses) - A - educator
107. [R] Health-economics Research Assistant (claims data studies, cost-effectiveness, HTA evidence) - B - researcher
108. [R] Policy Analyst for Regulators and Think-tanks (market conduct, complaint trends, product standardisation outcomes) - B - regulator analyst

NEVER an AI Employee (tier C)

Decline, load or cancel a policy; deny, repudiate or short-settle a claim as the sole decision; allege fraud against a person or hospital; certify medical necessity; appoint or remove a network hospital; set rates or reserves; sign a regulatory return or reinsurance treaty; advise a customer to buy as if licensed; contact a patient to pressure a claim withdrawal; misuse health or genetic data beyond consent; make an ombudsman or court filing in someone's name.

Suggested build order

1. **Wave 1 - customer-side + admin (tier A, no regulated decision)**: 14, 15, 17, 21, 26, 32, 35, 39, 42, 43, 46, 48, 49, 50, 53, 63, 64, 78, 79, 80, 81, 86, 87.
2. **Wave 2 - assist with a named human**: 11-13, 33, 34, 44, 45, 47, 65, 66, 73, 74, 92-94.
3. **Wave 3 - fraud, pricing, underwriting AI (regulated, needs model governance 76)**: 3-7, 22-25, 55-62, 88, 97. Fit to Hoola: department **"Health Insurance & Payers"** beside Healthcare / Pharmacy / Devices / Diagnostics / Medical Education; extend the existing insurance-agent employee (`ins` lane) for [X], reuse hospital insurance-desk roles (HO#80-82) for cashless [P], Khata ledger (28, 48), WhatsApp opt-in (15, 49), Pehchaan Locker (14, 81), pylab (3, 4, 6, 99), `health_int` (92, 93), approval cards for every signer step. **Best first pilot: the customer side** - a policyholder or an agent: Claim Companion + Deduction Explainer + Appeal Drafter + Policy Vault (78-81) - it fits Hoola's "your avatar works for you" brand and needs no insurer deployment. Second pilot: a hospital's TPA desk (32, 34, 39) because the hospital already pays for that pain.

Open questions for the owner

- Which seat first: **policyholder / agent** (B2C or B2B2C, fastest), **hospital TPA desk** (HO overlap), **TPA/insurer claims** (large deals, deep integration, strict model governance), or **government schemes**?
- Customer-side employees must never act as the adviser or the lawyer; confirm the disclaimer wording and whether an IRDAI-registered adviser must be in the loop for Wave 2 (11-13).
- Which country leads? India (IRDAI/NHCX/PM-JAY) is assumed; the US prior-auth/denial-appeal market is large but HIPAA-heavy and crowded.
- Do you want the claims employees to submit through NHCX directly, or only prepare packets beside the hospital's/TPA's system?
- "GO per field" turns each into a sourced report with IRDAI circulars and NHCX specs checked on primary text.
